PROJECTS

Real Time Chat Application. a platform where users can send and receive messages in real time. Users should be able to create chat rooms, join existing ones, and exchange messages with other users in the same room. The backend services will be hosted on Firebase, and users will authenticate with their Google accounts. Tech stack used - React.Js, FireBase. (Try it here) Github Repo

TextUtils. TextUtils is a free character counter tool that provides instant character count word count statistics for a given text. TextUtils reports the number of words and characters. Thus it is suitable for writing text with a word/ character limits. Tech stack used - React.js. (Try it here) Github Repo

Algorithm Visualizer. Visualize the sorting algorithms (Bubble sort, Insertion sort, Selection sort). Implemented a visual presentation of Sorting algorithms. Used advance DOM manipulation using Java script only. Used Promises and asynchronous functions to create a better visual effect. Tech stack used - HTML, CSS, JAVASCRIPT. (Try it here) Github repo

ACHIEVEMENTS

I have a huge interest in Problem Solving, Data Structure and Algorithms. I solve 600+ questions on different plateforms as.

- Leetcode(400+ Questons)
- Codechef(100+ Questions)
- Codeforces(100+ Questions)
- Rank - 2 (Zonal Level Coding Contest Orgnise By AKTU University).
- Rank - 26 (Codechef April Long Challenge).
- Rank - 24 (Codechef May Long Challenge).
- Technical Head - (PARAMPARA is an Annual fest of the college), in this, I am the Technical head, and I assist in 20+ technical Events on the college campus.
